

Urban Rooftop Gardening Co-op App

NAME: K ASHRITHA REDDY

SRN:PES2UG24AM071

Use-Case ID: UC-05

Use-Case Name: Manage Surplus Produce

Primary Actor: Co-op Gardener

Preconditions:

1. The co-op gardener has a registered account.
2. The gardener has registered a rooftop garden plot.
3. The gardener has recorded the harvest details for the produce.
4. The harvested produce is available in a quantity greater than zero.
5. The gardener has permission to create and manage surplus produce listings.

Main Success Scenario:

1. The gardener selects the "Manage Surplus Produce" option.
2. The system shows the gardener's registered plots and recorded harvests.
3. The gardener selects the produce that they want to list as surplus.
4. The gardener enters the quantity available for trading.
5. The system checks whether the entered quantity is valid.
6. The system compares the entered quantity with the available harvested quantity.
7. The gardener confirms the surplus produce listing.
8. The system creates the listing with the produce name, quantity, and availability details.
9. The new listing is added to the community trade board.
10. Community members can view the available surplus produce.
11. The use case ends successfully.

Alternate Flow: Invalid Surplus Quantity

5a. Invalid Quantity Entered

1. The system finds that the entered quantity is zero, negative, or more than the available harvested quantity.
2. The system displays a message asking the gardener to enter a valid quantity.
3. The gardener corrects the quantity.
4. The system checks the updated quantity again.
5. If the quantity is valid, the process continues from Step 7.
6. If the gardener does not provide a valid quantity, the listing is not created and the process ends
